B. PROPOSED CHANGES AND INDUSTRY ISSUES

Entities to face GST audit based on risk parameters

As per media reports, the GST department has come out with a plan to audit accounts of GST registered businesses based on the risk parameters. The guideline for the audit plan is issued by the director general of audit (indirect taxes) to the field formation officers. Based on the guidelines, the audit plan will be designed such that the taxpayers, along with their risk scores would be divided into three categories — large, medium, and small of which (1) 70% will have to be audited in each category on the basis of risk parameters in order of sequence; (2) 10% will be selected randomly; and (3) 20% would be picked by the commissioner considering the local risk parameters. Risk parameters may include history of tax evasion, irregular filing of returns and employing questionable accountants.
